File Layout (CSV) – Leave all unused values blank
- Part Number – 20 Characters
- Location – 2 Characters
- Quantity – Numeric
- Lot – 15 Characters
- Bin – 6 Characters
- Heat – 15 Characters
- Serial – 30 Characters
- Job – 6 Characters
- Suffix – 3 Characters
- Seq – 6 Characters (Defaults to 995000 if left blank)

Setup
- Install from ARC
- Create Directory
  - ..\Global\FILES\Vending
- Attach GAB_4978_Issue_Inv.g2u to Hook 38130 to automate the process
- Assign emails to the Users that will be running this menu item and/or assign an email for the Online Update user so email notifications are sent when the import fails. If no emails are assigned, nothing will be emailed and it will be your responsibility to check the Failed folder to see if anything hasn't processed.
- If you install ARC 4978 you will not be able to run ARC 4977

Process
- Place CSVs in ..\Global\FILES\Vending
- Run Custom Menu Item (On Line System > Transactions > Vending Machine [Inventory] or Online Update (Hook 38130)
- Files placed in ..\Global\FILES\Vending will be picked up and processed
  - Successful uploads will move the CSVs into ..\Global\FILES\Vending\Complete
  - Failed uploads will move the CSVs into ..\Global\FILES\Vending\Failed
    - You can see what the issues were by reviewing the Exceptions in ..\ Global\FILES\Vending\Exceptions
    - An email will be sent to the User running the menu item with the file attached that failed and the exceptions log.
